Anywhere

# Lessons Learned

1. Cloud engineering...  
is hard
2. Don't just replicate the  
data centre
3. Security and assurance
4. Runaway costs
5. No backing

# Our Advice

Support

Vision

Communication

Security

Control

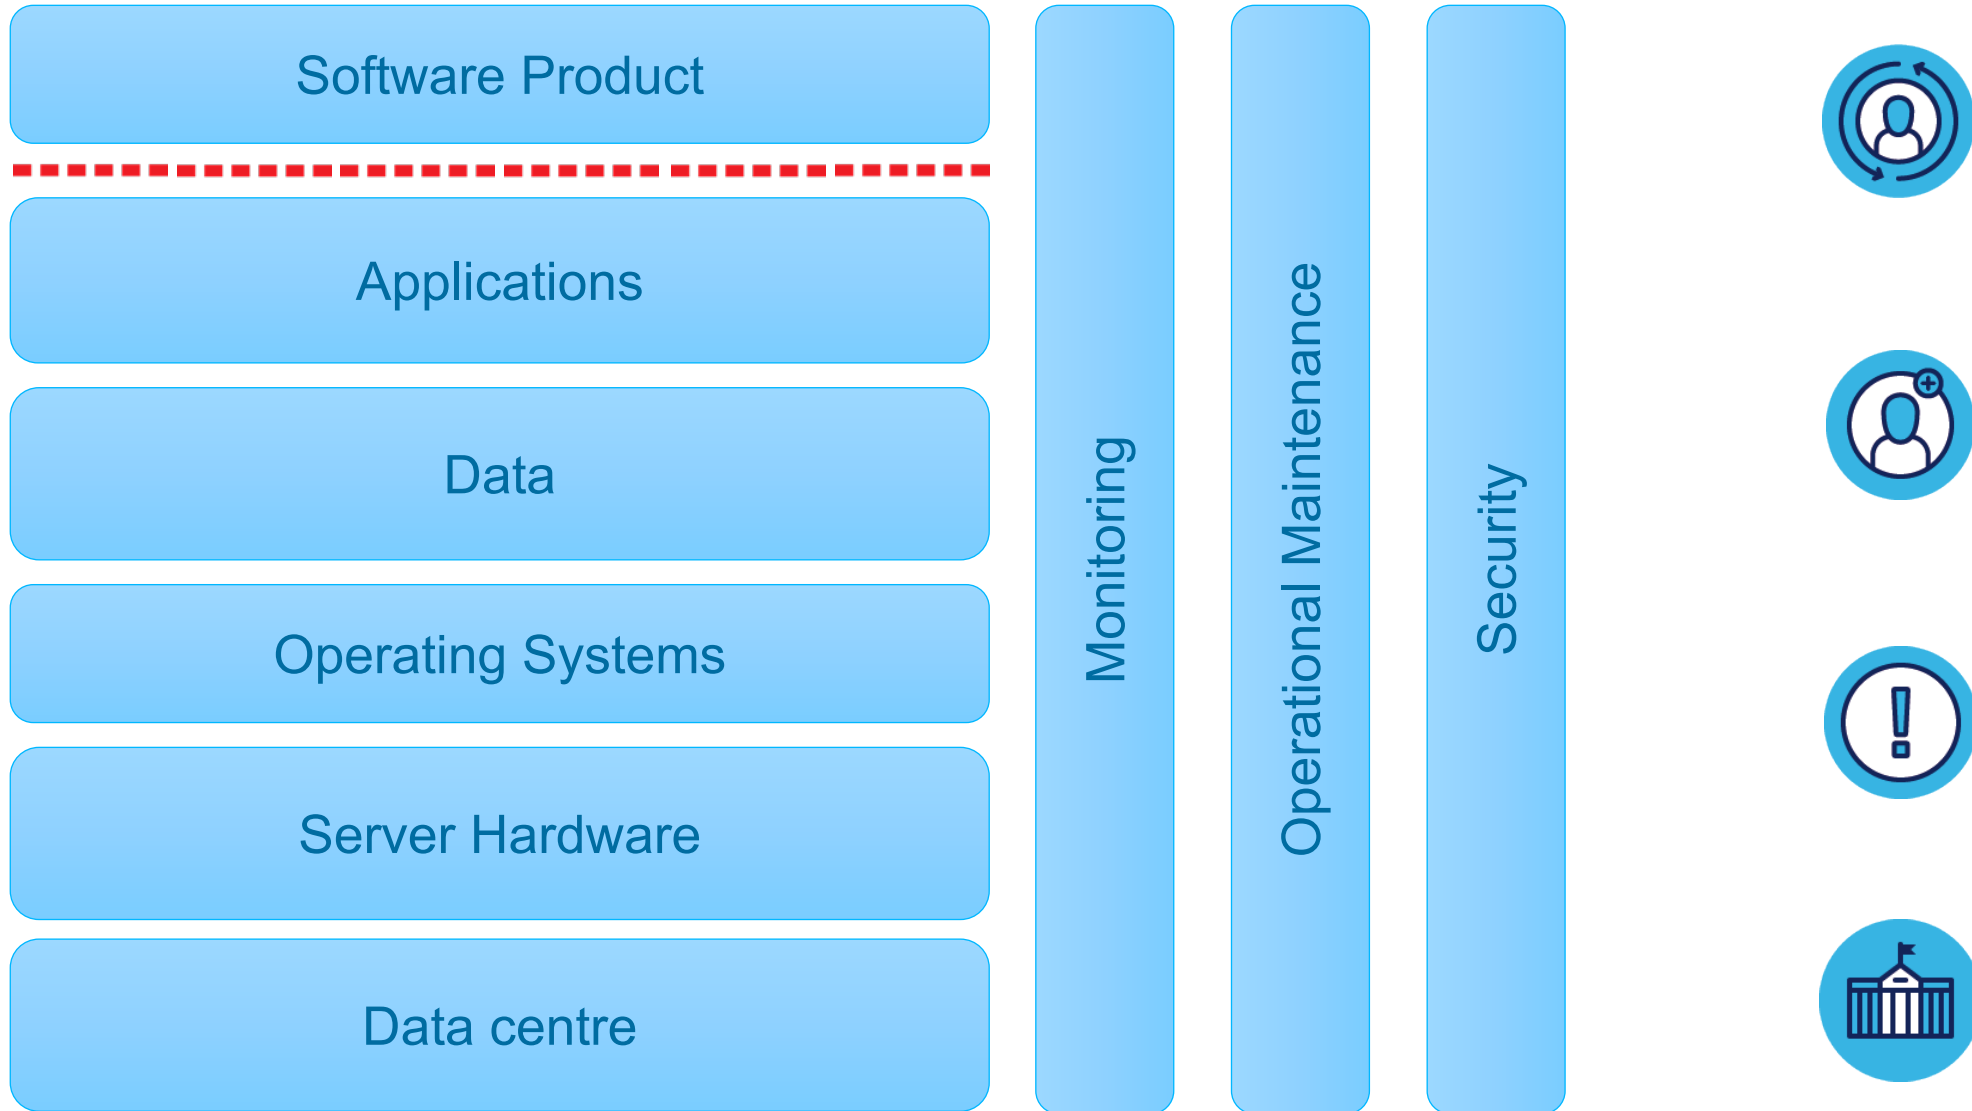

# Healthcare 2.0

# The Traditional Solution

## Vision

- Put day to day operational workload responsibility onto providers
- Keep networks and devices safe and concentrate on user experience
- Focus on health outcomes

# The roadmap to digital healthcare Nirvana

**Colin Truesdale**

# Climbing mountains on the way to Digital Nirvana

- **Still heavily reliant on physical information**
  - Medical records
  - Communication via letter / fax (email?)
- **Sharing agreements for information difficult to negotiate**
  - Technical issues in sharing between on-premise systems
- **Still organisation-centric, not patient-centric**
  - Integration of social care – threat or opportunity?

# STEP ONE

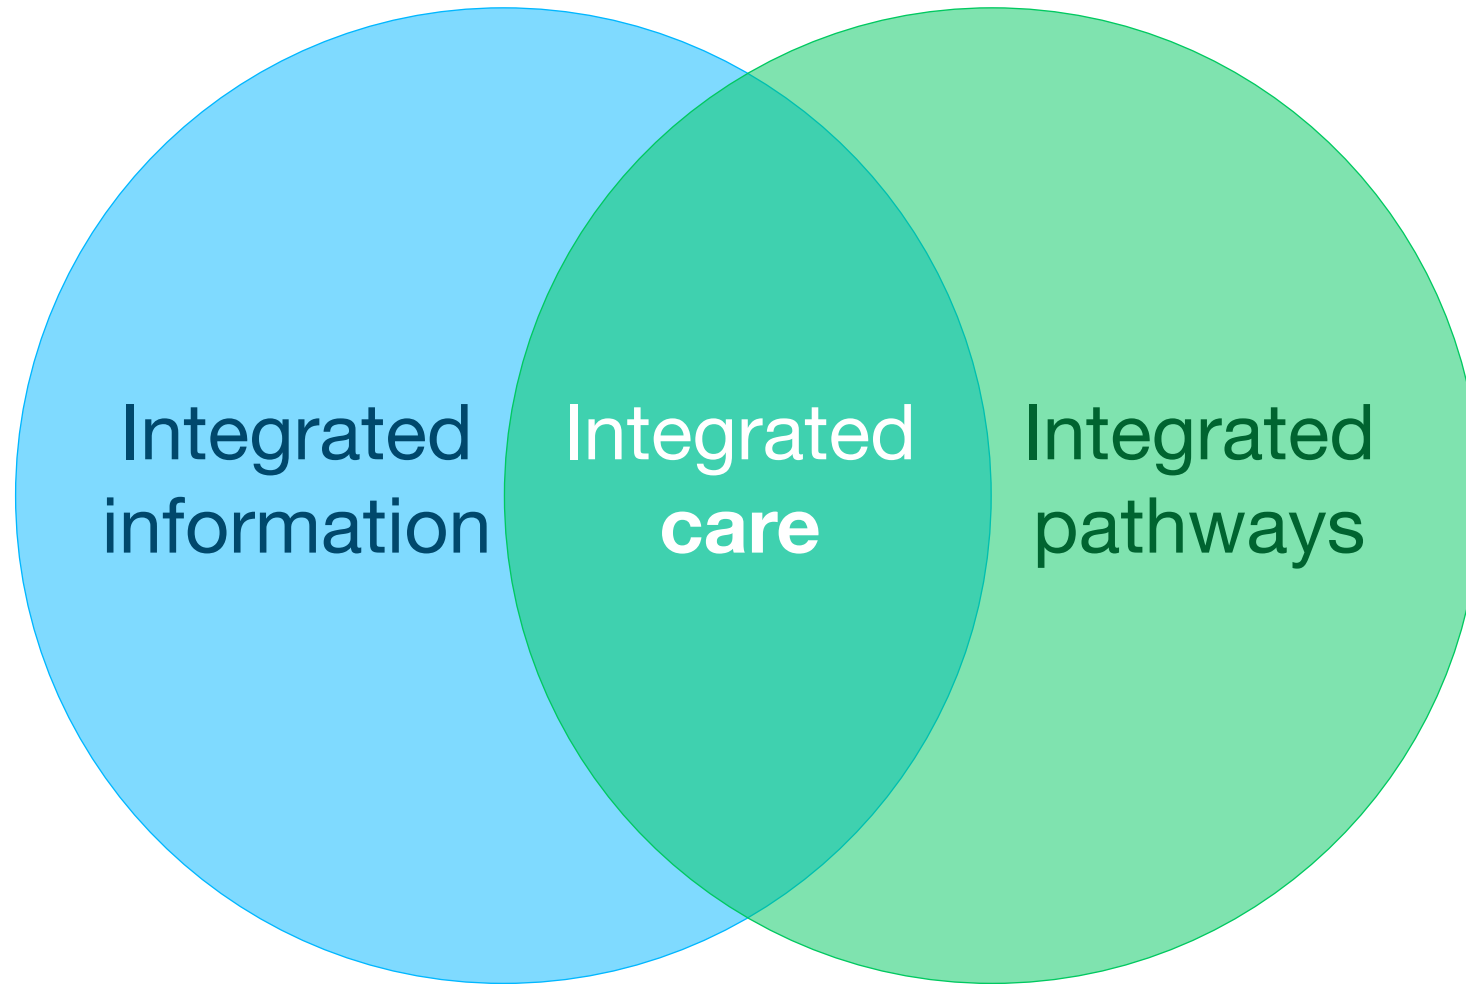

# LET'S GET DIGITAL

1. Remove the paper mountain
  - Selective scanning
2. Stop creating more!!
  - eForms and workflow
3. Make it easier to purchase
  - **Cloud** = reduced infrastructure
4. Make it easier to manage
  - Managed service on **cloud**
5. Get sharing
  - **Cloud** = simplified collaboration

# STEP TWO

# LET'S WORK TOGETHER

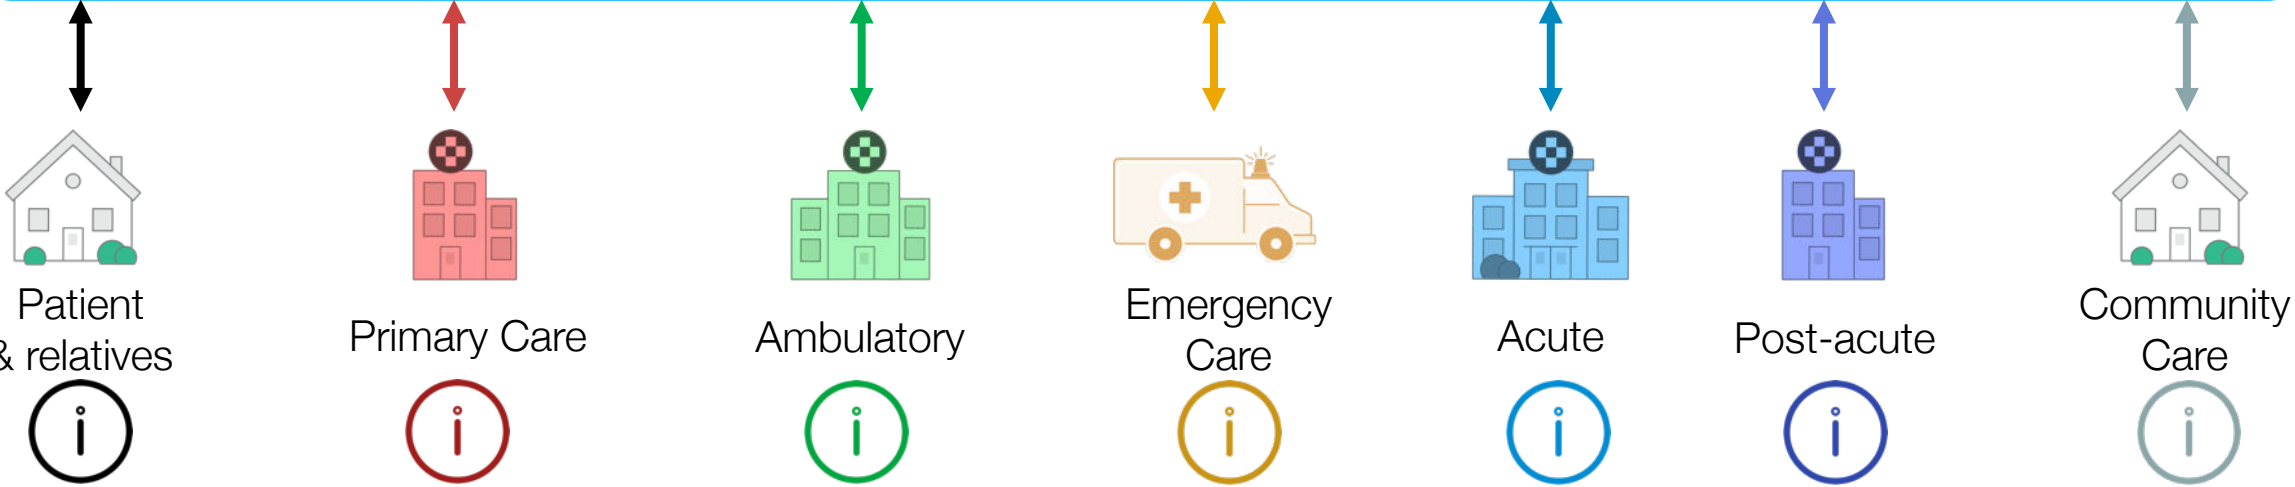

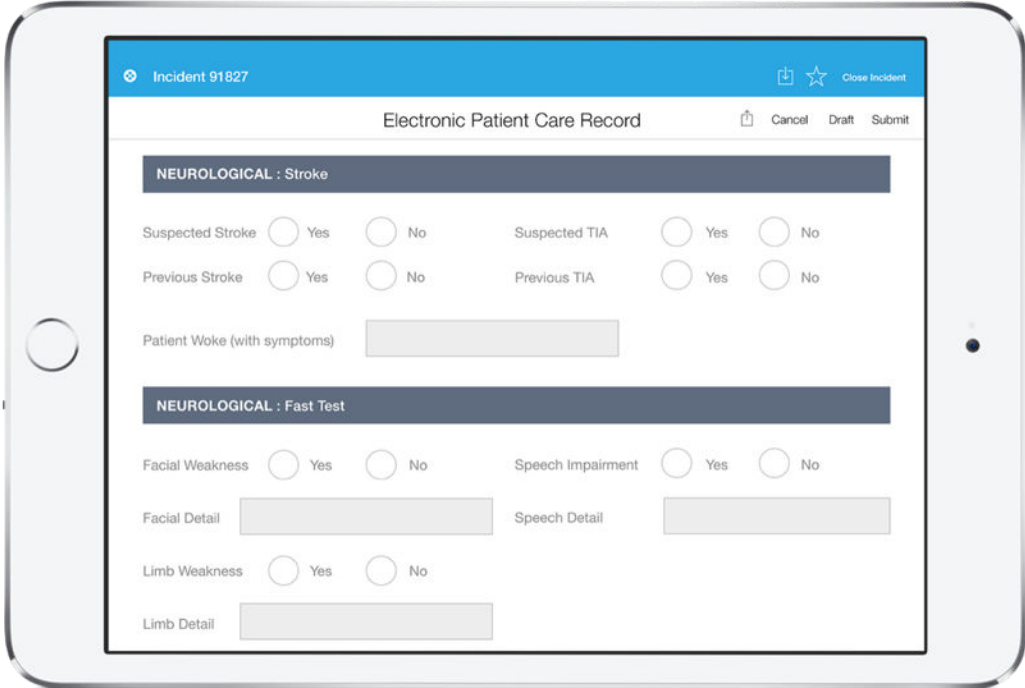

# Integrated information - unifying the care continuum

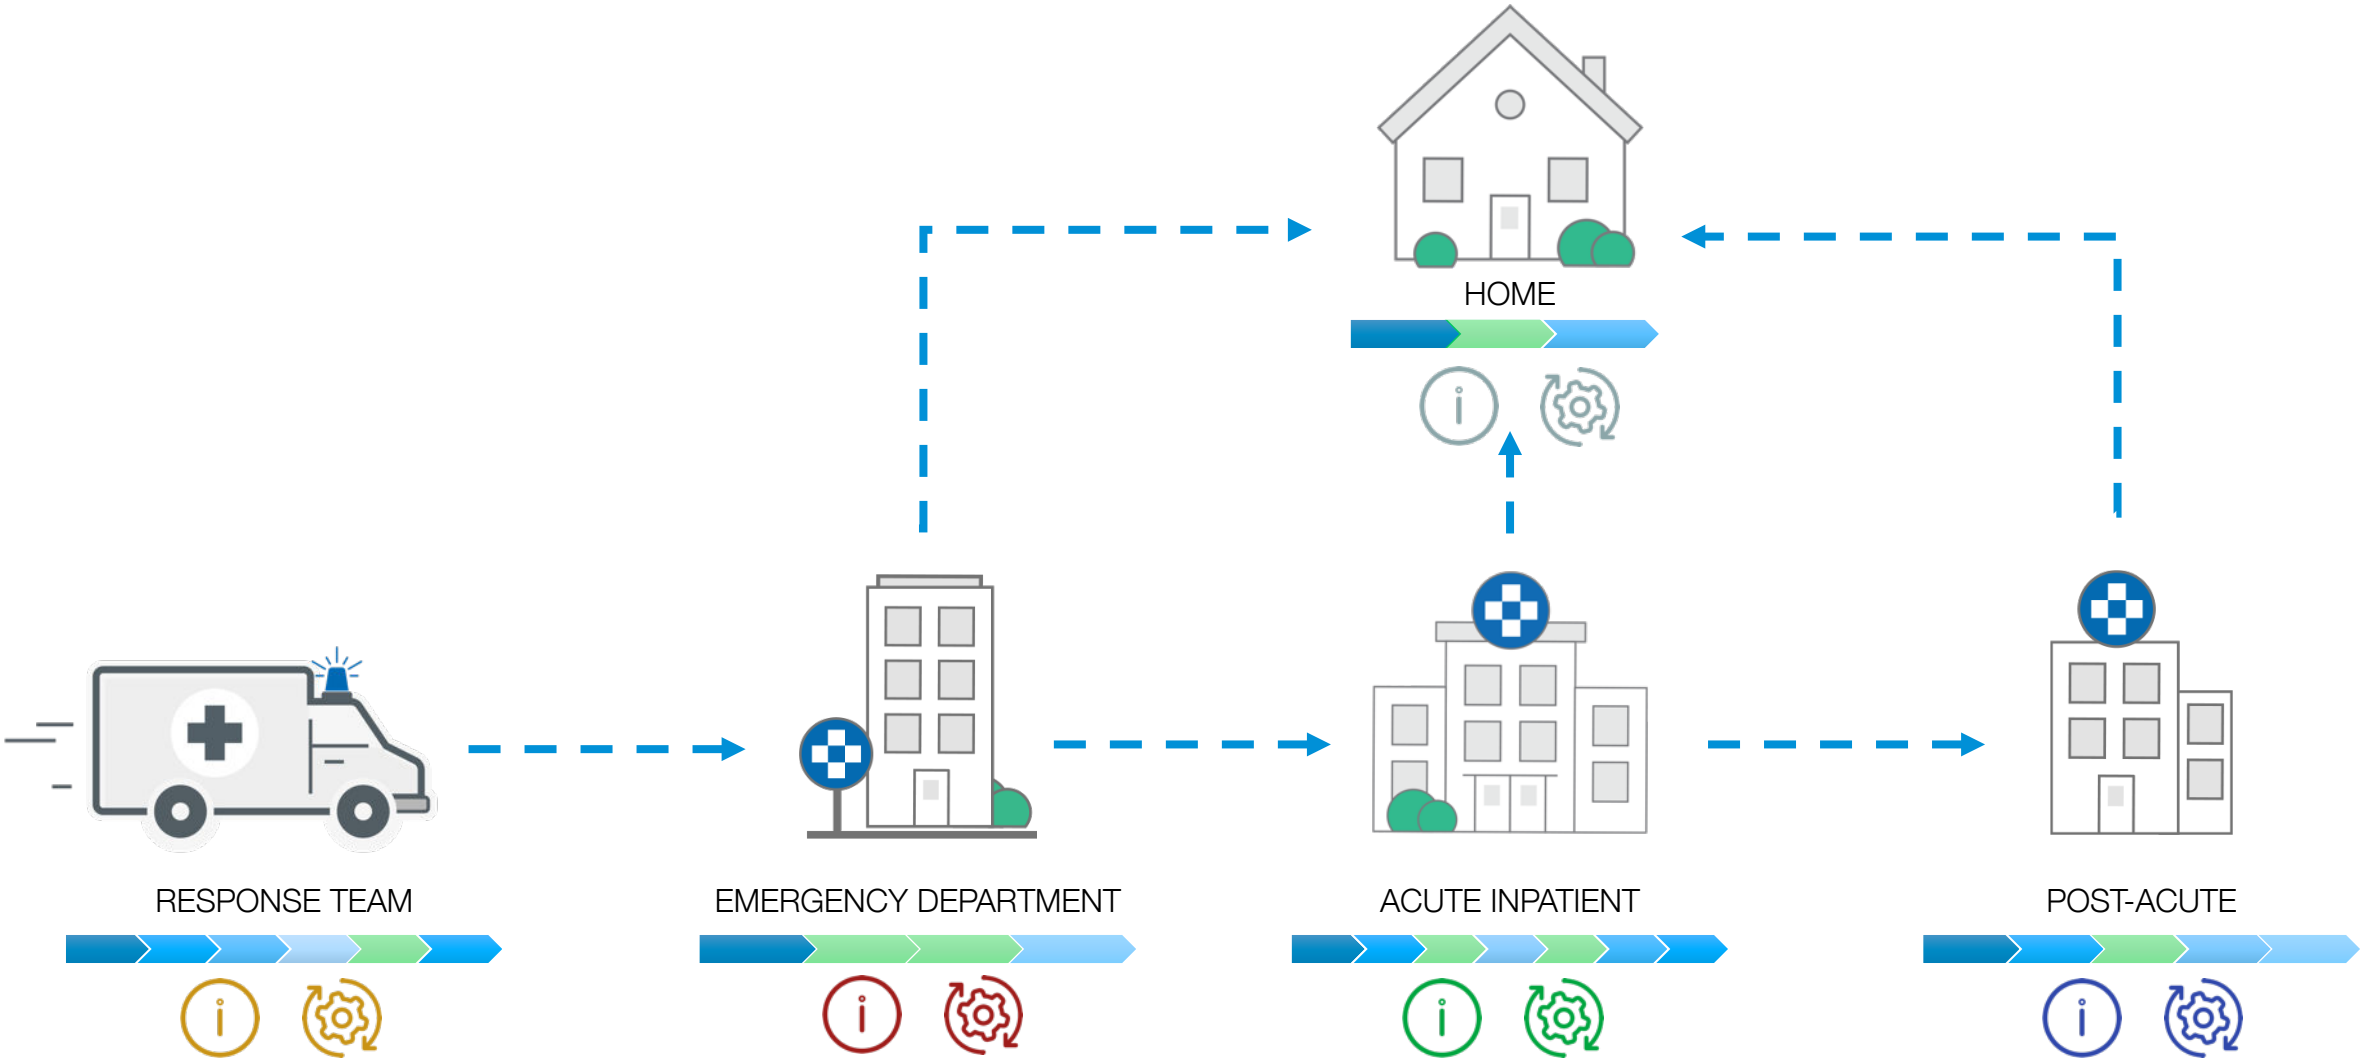

Unified view of the patient  
Automating the care pathway across providers

# Integrated pathways – bringing all the parts together

# Integrated pathways – bringing all the parts together

Thanks for listening!  
Any questions?
